FOUNDER(S) BIO

As humble a start can be with passion and will, we managed to transform launch of the group from a single company to a collective entity that provides a complete solution, in 2004 the founder decided to pursue their dreams and be a pioneer in their fields, by which we can say at the end of 2021 we have managed to overcome difficulties, and build loyalties from both customer and employees.

Our founders and CEO's are Engineer Ashraf Genady and Mohsen Hamdy, both are Electro Mechanical engineers, that they have a proven record of planning and implementation of some mega projects in a respectful companies, they have built a reputation of being those who get the job done in the field of automation.

As a result they decided to conjure the sea of entrepreneurship and launch their first company in 2004, 20 years later they have reached their goal, by becoming the leader of their market with collaboration of Multinational companies that do projects in both inside and outside of Egypt, transforming it from a humble beginning to an international group.

CEO MESSAGE

We have been able to achieve a substantial growth through a set actions, by which we can have an impact on people life everywhere, our actions can be summarized in positioning ourselves in the heart of every aspect of industry, looking after our stakeholders by ensuring they are gaining the best ROI not only to pass crises but expand year after another year, also providing factors of success to ensure the well fare of our stakeholder that together can overcome hardship and reach high level of customer loyalty.

Mr. Ihab Mohamed Abu El Hadid
